

ASE-Certified Biodiesel for Diesel Technicians Training Course

When: Wednesday, February 28th, 2018
Where: Wilsonville Training Center
29353 Town Center Loop E, Wilsonville, OR
Time: 10:00 AM - 3:00 PM
Register: <https://rebrand.ly/Biodieseltraining>
Contact: marketing@chooseSQ.com or 503.351.6839

Are you considering recommending biodiesel blends in the fleets you service, but concerned about the practical implications of making the switch? This course is for you. Designed to educate and inform diesel mechanics, fleet managers and service technicians about using biodiesel blends in existing equipment, this ASE/NATEF certified training will help you better advise your customers about the true impacts of choosing biodiesel. You'll learn:

- Biodiesel impacts on PM traps and NOx aftertreatment on new diesel engines
- Current OEM support for biodiesel
- Biodiesel fuel quality, performance and service requirements
- How to avoid fuel related problems in the field, regardless of root cause
- How to more accurately diagnose the root cause of equipment problems

About the Instructor

Steve Howell is an ASTM International Fellow and the Chairman of the ASTM Biodiesel Task Force responsible for the nation's biodiesel ASTM specifications. He serves as the Senior Technical Advisor to the National Biodiesel Board and is an ASE/NATEF certified instructor.
